PROFILE

Automation engineer who builds and runs client systems on GoHighLevel: sub-accounts, pipelines, workflows, custom objects, dashboards and API integrations, plus voice and chat AI agents wired into CRMs. 3+ years shipping production software (React, TypeScript, mobile), the last year focused on CRM automation for agencies. Comfortable working from SOPs, documenting every build, and flagging blockers early.

EXPERIENCE

GHL Builder & Integrations — UR Brave (white-label GHL agency), contract Aug 2026 – Present

- Onboard and build client sub-accounts end to end: pipelines, custom fields and objects, workflows, smart lists, reply snippets, dashboards.
- E-commerce client: synced WooCommerce orders into GHL custom objects with currency conversion; reconciled 684 orders against the store; distributor debt and stock tracked in the CRM.
- Sales ops: enriched the lead base from a public company registry (decision-maker role filled for 4,699 contacts); built an auto-feeder that drips a 4,294-lead queue into the pipeline at 40/day, one company = one deal.
- GHL Marketplace app for click-to-call telephony: OAuth 2.0, webhooks, multi-tenant storage with encrypted keys, SSO settings page; live since Oct 2026. Same pattern reused for a shipment-tracking integration (22 automated tests).
- Telegram recruiting bot feeding contacts and deals into GHL without duplicates (192 automated tests); AI chat agent that books meetings.
- Localized ~95% of the white-label GHL UI with one line of agency custom JS; 29-page marketing site on Cloudflare (DNS, Workers, deployments with tested rollbacks).

GoHighLevel (API v2, Workflows, Custom Objects, Marketplace, Conversation AI) · Cloudflare (DNS, Workers, D1) · WooCommerce · Telegram Bot API

AI Automation Engineer — US logistics SaaS Sep 2025 – Present

- Built and run production voice agents (ElevenLabs / VAPI + Twilio) for support and safety lines with CRM lookups, warm transfer and post-call ticketing: 223 live calls in a 3-day window, 157 closed with a ticket, 19 handed to a human.
- B2B lead-gen pipeline (n8n + Apollo + Tavily + Twilio + Pipedrive): scrapes companies, cross-verifies decision makers across two data sources, validates phone/email and writes person, lead and note to the CRM through a 5-gate funnel.
- n8n automations across telephony, helpdesk (Zammad), CRM (Pipedrive) and LLM APIs; RingCentral → Telegram alerts, Chatwoot ↔ Zammad sync, failure alerting.
- Measured before shipping: caught a 3× per-minute cost spike from a RAG setup ($0.077 → $0.223/min) and rolled it back the same day.

n8n · Apollo · Pipedrive · Zammad · ElevenLabs · VAPI · Twilio · LLM APIs

Mobile & Web Developer — freelance, ArmarSolutions, CodeHive Jan 2022 – Sep 2025

- Shipped production React / Next.js web apps and React Native / Flutter mobile apps (fintech, education), Firebase, REST integrations, store releases.

SKILLS

CRM & GHL	Sub-account builds, snapshots, pipelines, workflows, custom fields/objects, dashboards, Conversation AI, Marketplace apps, HubSpot and Pipedrive APIs
Integrations	REST APIs, webhooks, OAuth 2.0, Zapier / Make / n8n, Stripe, Slack, Telegram, WooCommerce
Lead gen & outreach	Apollo, lead scraping and verification, list cleaning and dedup, CRM import, Twilio
Domains & hosting	DNS on Cloudflare, Cloudflare Workers / D1, deployments with rollbacks
AI agents	ElevenLabs, VAPI, Retell-style voice agents, LLM APIs, prompt engineering
Code	TypeScript, JavaScript, Python, React, Next.js
Languages	English — Upper-Intermediate (B2), Ukrainian — native, Russian — fluent

EDUCATION

Kyiv National University of Technologies & Design — Bachelor's degree, 2019 – 2024
